

TeamA\_A100\_Website/blob/master/index.html

Being a part of the Winter 2013 Cohert, Team A's goal was to redesign and overhaul the A100 website. Below are a few snippets of code

1. from index.html

```
<div class="main-header section-fullwidth absolute-
head">
    <div class="section-inner">
        <div class="header clearfix">
            <div class="nav main-nav">
                <ul class="first animate">
                    <li><a href="#theprogram"
class="program_link goto active-link">THE PROGRAM</a></li>
                    <li><a href="#ourpartners"
class="partners_link goto">EMPLOYERS</a></li>
                    <li><a href="#" class="goto
aboutus_link">ABOUT US</a></li>
                </ul>
                <ul class="second">
                    <li><a href="#" class="apply-btn hidden-
apply">MENU</a></li>
                </ul>
            </div>
        </div>
    </div>
</div>
```

2. from main.js

```
// change the content of the page based on which link the user
clicked on. We have 3 mains links
// program_link, partners_link, and aboutus_link
// the following conditional function take the user to the clicked
link and hides the rest
$(".nav .goto").click(function() {
    var mobile = 0;
    if (window.innerWidth <= 440) {
        mobile = 129;
    }
    if ($("#hidden-apply").is(":visible")) {
        $("#hidden-nav").slideToggle(300);
        offset = offset - $("#hidden-nav").height();
    };
    if ($(this).hasClass("program_link")) {
        $("#program").show();
        $("#advert").html("A100 is a free eight-week web
```

```

development and job placement program. Interested?");
    $(".application-link a").html("Apply
Now").attr({"href":"Application2.html"});
    $("#top-banner .main-msg").show();
    $('html, body').animate({
        scrollTop: $("#advert").offset().top - 20 - mobile
    }, 100, "linear", function() {
        $("#partners").hide();
        $("#aboutus").hide();
    });
}
3. from responsive_head.css
.hidden-nav ul li a:link, .hidden-nav ul li a:visited {
    display: block;
    padding: 10px 10px;
    color: #000;
}

.hidden-nav ul li a:hover {
    color: rgba(168,3,146,1);
}

.hidden-nav ul li > a.active-link {
    color: black !important;
    background-color: rgba(122,2,33,0.1) !important;
}

```
